

# Retap Wooden Lid

Datasheet

The Retap Bottles are simple, functional and elegant. They praise the Danish design tradition and so does the Wooden Lid.

The lid is made of walnut wood and is handcrafted by a traditional craftsman on the island of Funen in the heart of Denmark.

Each single lid is unique and of excellent quality.

The Wooden Lid makes your Retap Bottle look even more elegant, for example in the conference room or on the dinner table.

**Passion for design.**
